Marketing Designer

iGavel.com July 2009 - Present

My job includes web design within a proprietary CMS platform, designing and distributing both digital and print marketing materials, and assisting with client relations.

Web Design Intern

BarterQuest June 2009

I was responsible for redesigning the layout of the website BarterQuest.com, as well as Quality Assurance testing.

Art Lead and Programmer

Electronic Design and Multimedia Program August 2008 - November 2009

I was in charge of the art assets in the game Checkpoint: TSA. My responsibilities included creating the art for the environment, user interface, and some character and prop art assets. I was also responsible for much of the game code, including the majority of the game logic and graphical engine integration, user interface code, and other areas.

Design Consultant

Science Division to the City College of New York April - June 2008

I was hired to help redesign the Forum of the Science Division at the City College of New York.

Website and Book Designer

Writing About Art January 2008

I designed and maintain the website WritingAboutArt.org as well as designed and implemented the layout for a book under the same name.
